

# 10 kg solar power generation price

## Overview

---

In 2025, a 10 kW solar panel system costs around \$25,400 before incentives, based on real installation data from across the country. But your actual price will depend on factors like your roof's complexity, local labor costs, the equipment you choose, and what incentives are available in your area. A 10kW solar power system usually covers 55 to 70 square meters and can generate up to 16,700 kWh of electricity annually. And since the average cost per watt of electricity varies from state to state, the price you pay will depend on the state you live in. You may pay as much as \$29,500.
