

50kW solar power generation in Iraq

Overview

Iraq is set to open its first industrial-scale solar plant in a vast desert area in Karbala as the government attempts to tackle an electricity crisis that has led to widespread blackouts. Its capacity is expected to reach 75 MW within the next two moves, ahead of a final 300 MW target. Image: Prime Minister of Iraq's Media Office

The first phase of Iraq's largest solar project to date has begun. The project is part of a wider strategy to meet Iraq's electricity demands through large-scale solar power plants. Iraq currently produces up to 28,000MW of electricity. The state-run Iraqi News Agency (INA) quoted.
