

# 5v to 24v step-up inverter

## Overview

---

Electric vehicles use 5V DC to 24V DC step-up converters to power auxiliary systems such as infotainment, lighting, and power windows. These converters draw power from the main battery (usually higher voltage) and convert it to 5V or 24V to power lower voltage systems. Check each product page for other buying options. Hence, understanding the diverse types of these converters facilitates users in choosing the proper converter.
