

ASEAN solar module mainland export tariffs

Overview

On 21 April 2025, the United States (U.) Department of Commerce announced tariffs of up to 3,521% on solar imports from Southeast Asian countries, threatening the export-oriented strategies of regional clean energy manufacturers. International Trade Commission has made an affirmative determination in its antidumping and countervailing duty (AD/CVD) investigation concerning silicon solar cells and panels from Cambodia, Malaysia, Thailand and Vietnam. The affirmative final decision from the ITC that the U. industry. The factory operated by Standard Energy Co, a subsidiary of Singaporean solar cell giant GSTAR, shut its doors last month in anticipation of United States President Donald Trump's tariffs on solar panel exports from Southeast Asia. But this is not simply a regional trade adjustment.
