

# Actual profit of solar photovoltaic power generation

## Overview

---

The profitability of a solar farm can be calculated using the formula: . The profitability of a solar farm can be calculated using the formula: . Solar energy can be harnessed two primary ways: photovoltaics (PVs) are semiconductors that generate electricity directly from sunlight, while solar thermal technologies use sunlight to heat water for domestic uses, to warm buildings, or heat fluids to drive electricity-generating turbines. Solar. One of the most compelling aspects of solar power generation is the significant financial returns it can provide to investors and homeowners.
