

Add solar panels on top of container

Overview

Are you considering mounting solar panels on a shipping container and wondering what to keep in mind?

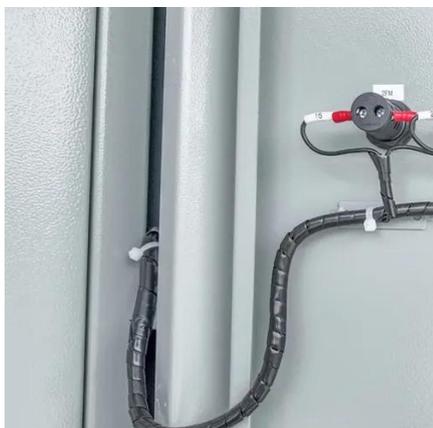

This article offers a concise overview to help you understand the key considerations and shows you some real-world examples. Can you put solar panels on a shipping container roof?

Absolutely!. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! Mounting several panels on top of a shipping container, without penetrating the roof?

Please picture a standard 40ft shipping container (8 ft wide). I want to use something. From an over-thinking mind comes a channel dedicated to over-thought projects, including an off-grid workshop and tiny house build deep in the desert near Joshua Tree, CA! As a product designer/engineer and world-wide exhibited kinetic artist, you might say I have a unique perspective on things ;). Turn your container roof into a power station - without welding, cutting, or complicated installs! Our solar panel mounting kits are designed specifically for shipping containers. All modules face same direction. This system can accept six-twelve solar modules, of either 60 or 72 cell format (modules not included).
