Two Types of Solar Power Plants
A View of Unintended Artistic Beauty
In 2021, Hegen traveled through the United States, France, and Spain to photograph vast solar energy infrastructures that will be delivering clean energy for generations to come. The photos were shot from a helicopter. "In a single hour, the amount of power from the sun that strikes the Earth is more than the entire world consumes in a year," Hegen See more on [petapixel](#) [iStock](#)
