

All-vanadium ion flow battery

Overview

The vanadium redox battery (VRB), also known as the vanadium flow battery (VFB) or vanadium redox flow battery (VRFB), is a type of rechargeable flow battery which employs vanadium ions as charge carriers. [5] The battery uses vanadium's ability to exist in a solution in four different oxidation. Modular flow batteries are the core building block of Invinity's energy storage systems. The electrolyte, a crucial component utilized in VRFB, has been a research hotspot due to its low-cost preparation technology and performance optimization methods.
