

Amazon Energy Storage Box Certification Report

Overview

We signed the first European Union (EU) Battery Energy Storage System (BESS) PPA that includes a 4 MW rooftop solar photovoltaic system paired with a BESS in Spain. This BESS initiative is expected to yield nearly 500 metric tons of CO₂e avoided annually and enhanced energy. Dive deep into our documents and downloads, which describe how we're building a more sustainable company for our customers, our people—and, importantly, the planet. Amazon is a global company with more than 1.5 million full- and part-time employees worldwide and operations in Africa, Asia-Pacific, Europe, Latin America, the Middle East, and North America. At Amazon, we combine data and science with passion and innovation to tackle some of the world's most. The Baldy Mesa Solar and Storage Project (developed and operated by AES), located in Adelanto, California. Employees inside one of our newest office buildings in Bellevue, Washington. Introduction CSO Letter How We Work Goals Summary 2023 Year in Review About This Report This is our sixth annual. In 2024, 100% of the electricity consumed by Amazon was matched with renewable energy sources for the second consecutive year. ² As the world's most comprehensive and broadly adopted cloud, AWS is committed to building a more energy efficient and lower-carbon business for our customers and the. According to the International Energy Agency (IEA), total energy-related CO₂ emissions increased by 1.1% and CO₂ emissions reached a new record high of 37. Amazon recently announced that we met our 100% renewable energy goal, seven years early. Making progress like that—especially with operations as complex.
