

Analysis of solar power tax

Overview

Senate Republicans stepped up their attacks on U. solar and wind energy projects by quietly adding a provision to their megabill that would penalize future developments with a new tax. These incentives raise tax planning issues that go well beyond those involved in general structural, choice-of-entity, and other financing considerations, and create the potential for significant economic benefit. That new tax measure was tucked into the more than 900-page document released late Friday that also would. This legislation brings significant changes to the federal tax credit for residential and commercial solar and battery systems. Under this new law, homeowners who purchase their systems with cash or a loan will no longer be eligible for the 30% federal tax credit after December 31, 2025. 2025 has been a challenging year for renewables. Wind and solar investments in the first half of 2025.
