

Australian rooftop solar power station

Overview

With Australians installing about 300,000 rooftop systems a year, 1 in 3 Aussie homes now have rooftop solar. Solar uptake has been driven by the Small-scale Renewable Energy Scheme (SRES) which cuts upfront costs by about 30%. Australia's rooftop solar fleet continues to expand with a combined 28.3 million installations across the country. From pv magazine Australia A new report from the Clean Energy Council (CEC) shows Australian homes and. The Clean Energy Council's bi-annual Rooftop Solar and Storage Report (Jul-Dec 2025), shows more than 183,245 battery units were sold in the second half of 2025 alone - a four-fold increase compared to the same period in 2024. 8 gigawatts of clean power generation capacity connected directly to local electricity networks that serve homes and businesses. But as battery demand surged, the council noted that Australians may have.
