

Base station of China Mobile Communications

Overview

China unveils the world's first military-grade mobile 5G base station, developed by China Mobile Communications Group and the PLA, designed for battlefield use to enable seamless communication for up to 10,000 military robots and drones within a 3-kilometer radius. This new system, set to be deployed in combat scenarios, promises to revolutionize. Even as China is said to be building the largest unmanned army in the world, its military communication technologies got a major upgrade with the introduction of the first mobile 5G base station in the world.
