

Battery cabinets produced in Finland

Overview

In Finland, three-meter-tall containers have appeared quietly in forests, fields, and along highways, looking unassuming but packed with technology. From advanced batteries to smart software, the Cactus system is designed and built in Finland. Developed for businesses and grid-scale projects, Cactus energy storage systems improve energy efficiency. Merus Power provides a complete one-stop-shop solution with full system integration, grid code compliance, and simulation models, ensuring the fastest time to market for your energy projects. Since the country has committed to the goal of carbon neutrality in 2035, new sources including wind, solar and. Ensto Building Systems specializes in electrification products and solutions, including electric vehicle charging, which is relevant to battery storage. These rugged, weather-resistant cabinets offer exceptional performance in various environmental conditions at a medium-sized Finnish city all year round. This EES system comes with a 3-20kW hybrid three phase inverter and 5-40kWh high voltage battery modules. It is scaleable and up to 15 units can be connected in parallel.
