

Black tiles with photovoltaic panels

Overview

Terracotta solar tiles are equipped with photovoltaic (PV) cells, which are responsible for capturing sunlight and converting it into electricity. These cells are typically made of semiconductor materials like silicon, and when the sunlight hits the cells, the photons from the. These innovative tiles seamlessly integrate solar technology into your roof, providing clean and renewable energy while improving your home's curb appeal. So say goodbye to unsightly solar panels and hello to a fashionable and environmentally conscious option. Designed to blend seamlessly with residential roofs, these tiles offer a perfect combination of high performance and architectural appeal, enhancing both. Harnessing the sun's power is a brilliant way to reduce your energy bills, shrink your carbon footprint, and gain some energy independence. Install Solar Roof and power your home with a fully integrated solar and energy storage system.
