

Budapest cost-effective and safe solar container battery

Overview

Some 338 million forints of funding from the European Union's Recovery and Resilience Facility (RRF) is supporting the 6 MW facility that can store the electricity generated by around 350 homes with solar panels. The facility will be completed by November 2025. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition. The new 40 MW / 80 MWh system, installed at the Dunamenti gas power plant near Budapest, is the biggest of its kind in the country. MET Group has switched on Hungary's largest battery, a 40 MW/80 MWh system, at the site of a power station near Budapest. The company said it is the largest BESS in Hungary. The 40-megawatt (MW) / 80 megawatt-hour (MWh) system operates.
