

CEC Photovoltaic Energy Storage

Overview

The Building Energy Efficiency Standards (Energy Code) include requirements for solar photovoltaic (PV) systems, solar-ready design, battery energy storage systems (BESS), and BESS-ready infrastructure. A solar PV system is prescriptively required for all newly constructed buildings. The Energy Commission's Solar Equipment Lists include equipment that meets established national safety and performance standards. Image: Intersect Power The California Energy Commission (CEC) approved the Darden Clean Energy Project, the first to. The Edwards & Sanborn Solar + Storage Project features the largest PV array and BESS in the United States, but two proposed California projects could soon claim the crown. However, even. The Darden Clean Energy Project will support California's progress to 100% clean electricity, strengthen grid resilience, create local jobs and invest in communities while proving that large-scale clean energy projects can move quickly under the state's new accelerated permitting process. Known as the Opt-In Certification Program.

CEC Photovoltaic Energy Storage

[CEC Approves World's Largest Solar + Battery Storage Project in ...](#)

SACRAMENTO - The California Energy Commission (CEC) on Wednesday approved the Darden Clean Energy Project (DCEP), the first to be permitted under the state's Opt-In ...

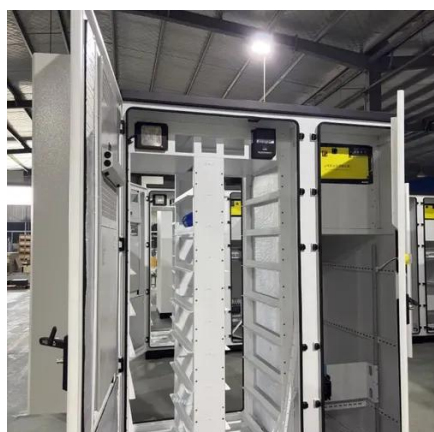

Opt-In Certification Program

This expansion allows the CEC to oversee the permitting of clean and renewable energy facilities, including solar photovoltaic, onshore wind, and energy storage systems, and facilities that produce or ...

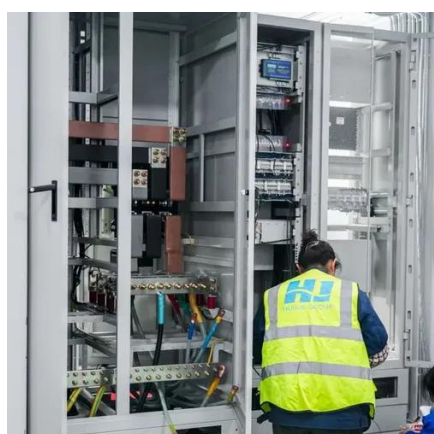

[Two massive solar and storage projects under review in California ...](#)

The California Energy Commission (CEC) is reviewing a pair of enormous solar + storage projects proposed by Intersect Power subsidiaries that, if constructed, would each become the ...

California Energy Storage System Survey

Energy storage is an important tool to support grid reliability and complement the state's abundant renewable energy resources. These technologies capture energy generated during non-peak times ...

[Solar Equipment Lists Program , California Energy Commission](#)

The Energy Commission's Solar Equipment Lists include equipment that meets established national safety and performance standards. These lists provide information and data that support ...

Solar Equipment List

This appendix outlines requirements for integrated battery energy storage systems to qualify for the compliance credit or the prescriptive requirements of the battery energy storage system as required.

California Energy Commission : Docket Log

On July 23, 2025, Levy Alameda LLC and Affiliates (Applicant) received an email from the California Energy Commission (CEC) for the Potentia-Viridi Battery Energy Storage Project (Project; Docket ...

Long Duration Energy Storage

Program

As the deployment of intermittent renewable energy sources accelerates and the frequency of extreme weather events increases due to climate change, there is a growing need for ...

[Largest battery storage project wins fast-track approval in California](#)

The California Energy Commission (CEC) approved the Darden Clean Energy Project, the first to be fast tracked under its Opt-In Certification program. The CES said that this battery ...

[Solar PV, Solar Ready, Battery Energy Storage System \(BESS\)](#)

The Building Energy Efficiency Standards (Energy Code) include requirements for solar photovoltaic (PV) systems, solar-ready design, battery energy storage systems (BESS), and BESS-ready ...
