

Can photovoltaic panels be used horizontally

Overview

However, when it comes to installing solar panels, homeowners often wonder if they can be mounted horizontally. The answer is a resounding yes! While it's true that most solar panels are installed at an angle to maximize sunlight exposure, there are certain circumstances where horizontal mounting. Solar panels can be installed in various orientations depending on the roof type, available space, and specific energy needs. The two most common orientations are: 1. Vertical (Portrait) Orientation: The longer side of the panel runs up and down. Still, you should be strategic with placement.
