

Can solar energy in the community be used to generate electricity

Overview

Community solar projects generate electricity from sunlight and the electricity flows through a meter to the utility grid., households, businesses, or any other electricity customer) pay for a share of the electricity generated by the community. Community solar customers typically subscribe to—or in some cases own—a portion of the energy generated by a solar array, and receive an electric bill credit for electricity generated by their share of the community solar system. Community solar can be a great option for people who are unable to. Households who own or rent their homes can use solar energy without having to buy or install special equipment.

Can solar energy in the community be used to generate electricity
