Clean the photovoltaic panels every few days

SŁONECZNY SKRZYPEK - Professional Energy Solutions

Overview

In general, you should clean your solar panels about every six months—but it really depends on your location. If you live somewhere where it rains a lot, you won't need to clean your panels as often as someone who lives in a dry and dusty area where debris builds up more. While going solar is pretty much a "set it and forget it" way to power your home with renewable energy, depending on where you live, you'll still need to clean your solar panels once or twice a year to ensure you get the maximum energy benefit from your solar investment. Following the solar panel manufacturer's maintenance suggestions is always a. Quick answer: Solar panels don't need frequent cleaning in most regions. Rain often removes light debris, but dust, pollen, bird droppings, or snow buildup can reduce output over time. A thin layer of dust can reduce your system's efficiency by up to 25%, turning your clean energy investment into an underperforming asset. The good news?

Proper panel cleaning is simpler than most.

Clean the photovoltaic panels every few days

How Often Should Solar Panels Be Cleaned? - Expert's Advice
