

Construction of brussels energy storage cabinet project

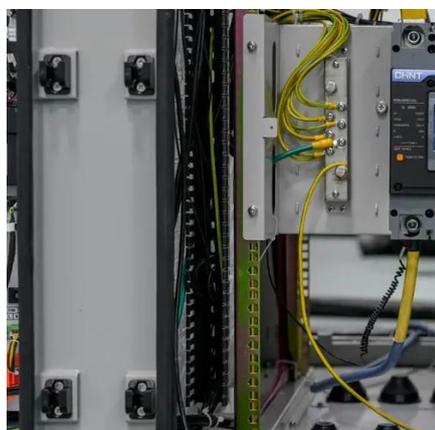

Overview

ENGIE and NHOA have confirmed a partnership to build a 320 MWh battery energy storage system (BESS) at Drogenbos, Brussels. This project is ENGIE's third battery storage development in Belgium. The BESS contract to NHOA covers supply, commissioning, and long-term service. The site, which currently hosts a gas power station, will become home to one of Europe's largest batteries. Project owners BSTOR and Energy Solutions Group have started building separate BESS projects totalling 440MWh of capacity in Belgium, following financial close, both of which will use Tesla Megapacks. Just a few weeks after starting commercial operation of the first half of its battery park in Vilvoorde, Engie has also connected the second 100 MW/400 MWh portion to the high-voltage grid.
