

Contracted land for solar power generation

Overview

A solar land lease is an agreement between a developer and a landowner where the landowner rents land to a developer to house photovoltaic solar arrays and develop solar energy. Solar leases involve long-term commitments, often spanning 50 years or more, necessitating thorough due diligence by landowners before signing. Utility-scale solar projects have been expanding across the U. due to a need for additional energy development, changing technology, and some encouragement through public policy. Landowners in some regions are being approached with exploratory offers to lease their land for solar development.
