

Data Center Rack Explosion-Proof Type Member Price

Overview

What Is an Explosion-Proof Enclosure?

An explosion-proof enclosure is a certified housing designed to withstand an internal ignition of flammable gases or vapors and prevent it from escaping to the external hazardous atmosphere. With a strong focus on SR42UBZ has been designed and tested to meet Telcordia GR-63-CORE Network Equipment & Building Systems (NEBS) requirements for Zone 4 Seismic Earthquake Environments. Our seismic racks meet strict industry standards, offering robust construction and enhanced stability to safeguard IT, server, and network. Our IT products are flexible and compatible with all rack mount servers or other electronics, to adapt to changing needs. UL rated for up to 3,000 lbs (1,360 kg) static load rating. Constructed in 14-gauge steel (body), 12-gauge steel corner braces and 16-gauge doors and side panels. EIA-310-D compliant 10-32 tapped or square hole punched rails with.
