

# Denmark energy conservation

## Overview

---

Denmark has been an early leader in decarbonisation and in 2022 the government announced a net zero by 2045 target, aiming at 110% emissions reductions by 2050. Wind energy is well-established in Denmark, which long ago decided to put the Danish climate's constant breezes and blusters to practical use. The government has expanded. The Danish Energy Agency is responsible for ensuring a secure and green energy supply — affordable and shared by all. 8% lower than in 2010 (normal climate). Energy consumption decreased in all sectors.

## Denmark energy conservation

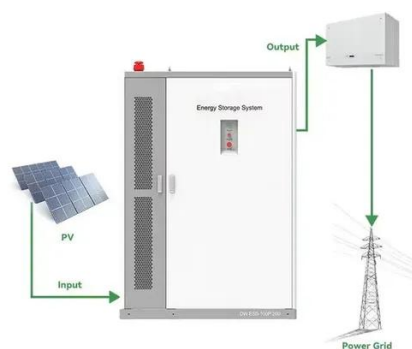

### The Danish Energy Agency , Energistyrelsen

The Danish Energy Agency has selected 10 companies from a pool of 16 applicants to compete for DKK 28.7 billion in funding for Carbon Capture and Storage projects. The funding is ...
