

Distribution of solar sites in Romania

Overview

Our dataset for Solar Photovoltaic Power Plants in Romania is one of the most comprehensive in the industry. As of July, 2025, we have compiled data on 127 verified listings. Complete business name, full address, and operational hours for all 127 Solar photovoltaic power plants. In response to the challenges and disruptions in the global energy market caused by Russia's invasion of Ukraine, the European Commission launched the REPowerEU Plan in May 2022, aimed at ensuring Europe's independence from Russian fossil fuels well before 2030. Maps and data are available for 200+ countries and regions. Please select a region or a country in the menu below. Several pressures have caused the solar industry to take note of Romania's increasing willingness to transition faster. Utility-scale installations almost doubled year-on-year, buoyed by a favourable regulatory framework. 2 GW of solar in 2025, according to figures from the Romanian. Following a period of lull, Romania has achieved in 2023 a significant milestone in its renewable energy journey - over 1 GW of new solar capacity installed in one year between distributed generation and utility scale projects.

Distribution of solar sites in Romania

Romania's Solar Energy Landscape: An Overview

This article will delve into Romania's solar landscape, providing a comprehensive overview of the current state of the market, government policies, and incentives, as well as the potential for future growth.

Romania and the path to renewables: solar panels

This distribution highlights the uneven yet significant strides being made across the continent in harnessing solar energy, reflecting a collective move towards renewable energy sources ...

The evolution of Romania's Solar PV market

The new solar installations, equating to a 308% increase compared to the capacity deployed the previous year, have set a new record high since the early 2010s' surge in renewable energy. Solar ...

Top five solar PV plants in operation in Romania

Listed below are the five largest active solar PV power plants by capacity in Romania, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...

Romania Renewables Map

Live, curated map of operational renewable energy projects in Romania - utility-scale solar PV (dispatchable sites only), wind farms and grid-connected battery energy storage systems (BESS).

Solar Power Plants in Romania (Map)

Data and information about Solar power plants and their location plotted on an interactive map of Romania.

[How Many Solar Photovoltaic Power Plants are in Romania?](#)

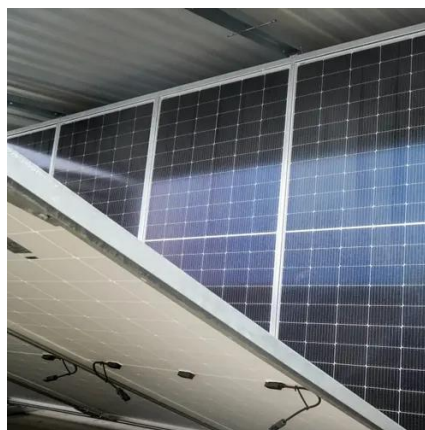

Our dataset for Solar Photovoltaic Power Plants in Romania is one of the most comprehensive in the industry. As of July, 2025, we have compiled data on 127 verified listings.

Monitor of the Romanian

Photovoltaic Projects

The regional distribution of large-scale PV projects in Romania demonstrates a commendable level of geographical diversity. The presence of projects in various counties indicates a concerted effort to ...

Romania installs 2.2 GW of solar in 2025

Romania announced a shift to a first-come, first-served system for capacity allocations through tenders in 2025, with the first auction planned for the second half of this year.

Global Solar Atlas

Specifically for Romania, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE ...
