

Electric vehicle adoption Ijubljana

Overview

Slovenia's capital Ljubljana will add 16 new battery-electric buses to its public transport network under a €11.6 million project co-funded by the European Union, as the city pushes ahead with efforts to cut emissions and modernise its fleet. Hop on the electric Urban train for a relaxed tour of the city's sights, or take advantage of the Kavalir electric vehicles, which provide free rides for the elderly and people with mobility. On 8 August 2025, Slovenia published a new public call (JP SUB-EV25-1) in the Uradni list SR, allocating non-repayable financial incentives to promote electric mobility. The initiative targets acceleration of clean vehicle uptake—aimed at businesses, private entrepreneurs, and VAT-registered. The city of Ljubljana, capital of Slovenia, will expand its electric bus fleet with the purchase of 16 new battery-electric vehicles as part of a project co-financed by the European Union. Organized jointly by UL, GEN-I, and Elektro. The Ministry of Cohesion and Regional Development has approved EU funding for the project Integrated Territorial Investments City of Ljubljana e-buses. This article explores how these advanced energy solutions are reshaping urban transportation while meeting Slovenia's As Ljubljana.

Electric vehicle adoption Ljubljana

Electric vehicle adoption Ljubljana

Some scenarios in the literature cover different approaches to predict the future of electric mobility and sometimes consider hurdle factors like consumer behaviour in the trajectory.
