

# Electric vehicle range mogadishu

## Overview

---

This chart shows an electric vehicle's official EPA range and energy consumption compared to the range and consumption results from Edmunds' own testing, which is designed to be a real-world complement to the EPA's laboratory-based process. PlugShare uses a color-coded system to convey charging station information: Green: Public charging (Level 1-2, up to 50 kW). Orange: Rapid high-power charging (Level 3). Grey: Stations partly occupied, availability uncertain. Wrench: Locations undergoing. S&P Global Mobility's latest research, taken from our E-Mobility Technology Module, reveals that the gap between advertised and actual EV range is driven by a complex mix of factors—temperature extremes, driving habits, terrain, and even tire choice. Contemporary EVs generally have a range from 100 to 300 miles (160 to 480 kilometers) on one charge. The electric vehicle market in the Middle East and Africa was valued at USD 3.06 billion in 2026 to reach USD 20.15% during the forecast period (2026-2031). Yet, within these hurdles lie opportunities for innovation, economic growth.
