

Electricity capital

Overview

We are an engineering-led early-stage venture firm investing in companies and protocols uniquely enabled by cryptography and distributed systems. Founded in 2018, our 30 person team is 61% engineers and 35% former founders. THE 2024 ELECTRIC CAPITAL DEVELOPER REPORT IS LIVE! We invest in the next generation of iconic founders. Every major coordination problem in history has been solved through central authorities. Protocols are the rare exception. When they work, protocols become infrastructure that entire economies. We are a leading investor in the energy transition, specializing in electricity and sustainable infrastructure. Launched in 2018, Electric Capital has become one of the largest global VC firms focused on distributed systems, cryptography, applications of blockchain, and privacy preserving. Electric team members have collectively started eight companies (six acquired), shipped products for billions of users, run billion-dollar business units, invested in 100+ technology startups that now have a cumulative market cap of \$50B+, and traded billions in derivatives.
