

# Emergency Rescue Use UAE Smart Network Cabinet

## Overview

---

The UAE Cabinet has greenlit technical regulations for the e-Call system, aimed at significantly reducing emergency response times by up to 40%. This system, already integrated into select vehicles, automatically sends critical emergency alerts to police when sensors detect a. Abu Dhabi: The Technology Innovation Institute (TII) has announced the development of an integrated system designed to provide real-time aerial data by unifying the operations of autonomous, long-range drones powered by swarm-technology under a single operational framework. Also Read: Dubai. The rapid growth of tourism and urbanisation across the United Arab Emirates has created a demand for more innovative ways of ensuring public safety. Dubai alone welcomed nearly 19 million international tourists in 2024. Because drones can be quickly deployed over disaster zones, responders are using drones such. In recent years, drones have emerged as a groundbreaking tool in various sectors, including rescue operations. A pilot study is conducted to achieve this aim.
