

Energy Bureau issues wind power generation targets

Overview

The Trump administration on Monday ordered a halt to five offshore wind projects currently being built in the United States, a major new attack on a power-generating industry even as voters fret about climbing electricity prices. Secretary of the Interior Doug Burgum signed a Secretary's Order to more efficiently manage our nation's energy resources by permitting projects that optimize energy generation while minimizing their environmental impact. Massive, unreliable energy projects, such as wind. Wind power or wind energy is a form of renewable energy that harnesses the power of the wind to generate electricity. It involves using wind turbines to convert the turning motion of blades, pushed by moving air (kinetic energy) into electrical energy (electricity). solar and wind power installations. According to some estimates, offshore regions of the contiguous. Why are Midwest grid operators turning away wind power?
