

Energy storage policy updates bulgaria

Overview

Bulgaria's Ministry of Energy has approved €588 million in funding for 82 standalone battery energy storage projects, totaling nearly 9. The final decision, announced on April 17, 2025, concludes a competitive selection process that began with 151 proposals in August 2024. The damage is such that repairs could hardly be made and it will probably be necessary to completely rebuild the power plant. As a possible reason, sources from "Capital" point to the lack. Bulgaria installed 1,416 MW of new solar capacity last year, extending its run of annual additions above 1 GW to a third straight year and raising total installed solar capacity to 5,984 MW, according to data from the ENTSO-E Transparency Platform. Growth was led by ground-mounted utility-scale. It is attracting significant interest from foreign and domestic companies alike. Substantial investment will be required, as the energy system transitions towards a more diverse energy mix, including high levels of renewable generation and new approaches to power system engineering and management. Kalina Trifonova, deputy chairperson of the management board at energy supplier EVN Bulgaria, elaborates on why she believes energy.
