

# Energy storage system power device procurement

## Overview

---

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase Agreements (PPAs), and term sheets. chapter offers procurement information for projects that include an energy storage component. The checklist items contained within are intended for use in procurement of commercial scale lithium-ion. In an era where the electric power generation industry is rapidly embracing renewable energy sources and advanced technology, energy storage system procurement has become a strategic priority. Relax, you've found the cheat sheet. This guide targets: Battery cells: The "meat" of your system. By understanding the technology and market, DNV helps you choose the storage system best suited to your needs and negotiate your agreements For stakeholders investigating the potential of installing energy storage systems on their sites, procuring energy storage can be a challenge. Investments: The country is attracting investments in battery factories, with projects worth up to EUR 360 million underway<sup>2</sup>.
