

Energy storage zero-decay battery

Overview

China-based Contemporary Amperex Technology Co. (CATL) has launched its new TENER energy storage product, which it describes as the world's first mass-producible 6.25 MWh TENER energy storage system is packed in a. Developments in batteries and other energy storage technology have accelerated to a seemingly head-spinning pace recently — even for the scientists, investors, and business leaders at the forefront of the industry. It increases system resiliency in the face of unpredictable and unexpected situations. Energy storage is also used to reduce energy costs by charging batteries. On April 9th, CATL revealed TENER, the world's inaugural mass-producible energy storage system boasting zero degradation within its initial five years of operation, in Beijing, China.
