[NFPA 110 Installation and Environmental Considerations](#)

Location Considerations
Lighting
Mounting and Vibration
Noise and Enclosures
Heating, Cooling, and Ventilating
Fuel System
Exhaust System
Protection
Distribution Wiring
The EPS shall be installed in a separate room for Level 1 installations. The room in which the generator is located must have a two-hour fire resistance rating. NFPA 110 allows, but does not require that, the EPSS equipment (e.g. transfer switches, circuit breakers, etc.) be installed in the EPS room. However, it does not allow any other equipment
