

Gigawatt solar project in athens

Overview

(IN BRIEF) RWE and PPC, in collaboration through their joint venture company Meton Energy S., are accelerating Greece's energy transition by investing in solar projects with a collective capacity of nearly 1 gigawatt. This solar farm is the last project of the 940 MWp (870 MWac) Amynteo portfolio, which is now entering the construction phase. In addition, the joint venture between RWE Renewables Europe & Australia (51%) and PPC Renewables (49%) is developing a solar project pipeline of similar size in Greece. German energy group RWE AG (ETR:RWE) and Greek power utility PPC SA (ATH:PPC) have secured debt financing for the construction of 691 MW/730 MWp of solar parks in Greece, all planned to go online next year. The proposed new solar farm, dubbed Orycheio Dei Amynteo (Amynteo Cluster III), will have a total capacity of around. The ACC Library recently celebrated the installation of a new solar array that will power a significant part of their electricity needs every year. The final investment decision has been made for a new photovoltaic project.
