

# Greenhouse solar water storage tank

## Overview

---

Black tanks absorb more solar heat, creating warmer water ideal for hydroponics but potentially increasing evaporation. You can manage temperature by covering black tanks partially or using. Solar water storage systems capture thermal energy from the sun and store it for later use. Water stores 3 to 4 times as many BTU's per lb. These systems combine solar power with modular design to create water solutions for: Think of them as LEGO blocks for water.
