

Guyana electricity market

Overview

GPL dominates the electricity sector in Guyana as a vertically integrated government-owned utility with a monopolistic position on transmission and distribution, and a major stake (55%) in generation. Petroleum and other liquids account for 99.2% of Guyana's energy production and 99. The remainder is made up of natural gas and renewables such as wood and sugar cane residue. Although the country has a large potential for hydroelectric and bagasse -fueled power generation, most of its 226 MW of installed capacity correspond to thermoelectric. Currently, Guyana's powership arrangement involves two vessels—one generating 36 megawatts (MW), the other 75 MW—leased to supplement the country's existing infrastructure. Delivered by UCC Holdings and operated by Karpowership, these floating power plants are designed to meet the country's rising. Guyana's energy sector is characterized by a heavy reliance on oil and diesel, with daily consumption reaching approximately 391,000 barrels as of 2023. Despite serving around 92% of its population, the country's electricity infrastructure is aging and often inadequate, leading to frequent and. Learn about the market conditions, opportunities, regulations, and business conditions in Guyana, prepared by at U.

Guyana electricity market

Electricity sector in Guyana

GPL dominates the electricity sector in Guyana as a vertically integrated government-owned utility with a monopolistic position on transmission and distribution, and a major stake (55%) in generation.

Renewable energy
History of the electricity sector

The "Energy Policy of Guyana," completed in 1994, advocates the replacement of imported petroleum, as far as possible, by indigenous renewable energy sources. Increased and more efficient use of domestic energy resources, primarily hydropower and bagasse for electricity generation, is envisaged to contribute significantly in this regard. A System Development Plan prepared by GPL in 2000 and its 2007-2011 Development and Expansion Programme reflected the official government policy of utilizin...

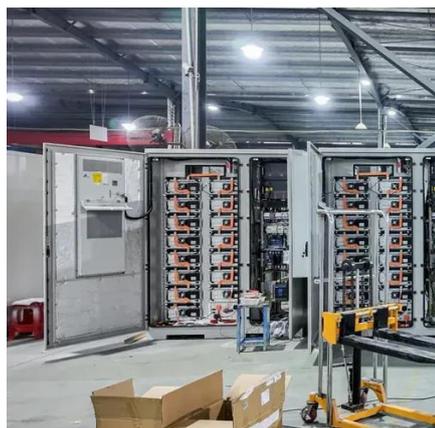

[Electricity demand climbs to 221 MW; GPL projects surge to 300 MW ...](#)

Guyana's electricity demand has surged to unprecedented levels, with the country recording a peak of 221.3 megawatts in September, up from 180 megawatts during the same period ...
