

How much does the perc component cost

Overview

Perc tests typically cost \$300-\$1,000 and are usually paid for by buyers as part of their due diligence. In seller's markets, sellers may conduct perc tests proactively to increase property marketability and value. You may spend as little as \$300 on a basic perc test, whereas large, more complex perc tests cost up to \$3,000 or more. You can do. A perc test – crucial for determining if land can support a septic system – can make or break a property's development potential. Understanding who handles this expense helps you navigate land transactions more confidently. We may earn revenue from the products available on this page and participate in. Understanding the cost of a perc test is important for several reasons: 1. The average cost to perform a percolation test is \$600 to \$800, with the average customer paying \$725 for a percolation test with one or two holes measuring more than 2 feet deep.
