

# How to construct photovoltaic bracket in winter

## Overview

---

This is a simple DIY solar panel mount that will keep your panels snow free when you aren't there to clean them off. In this video I show you how to build this. PV systems are also reliable electricity generators in the winter months, albeit with lower yields because the sun is lower and the days are shorter. However, contrary to popular belief, cold and snow can actually have a positive effect on performance. But here's the rub: conventional solar construction methods often fail when. So, what features should a good solar photovoltaic bracket Photovoltaic Bracket have to perform well in snow - prone regions?

The number one thing is strength. Galvanized steel is a popular choice. Heavy snowfall can put significant stress.
