

How to raise and lower solar panels

Overview

In this video, I show you a simple, safe, and effective method to get your solar panels up without damaging them or risking injury. Whether you're a solar installer or a DIY enthusiast, this method will save you time. To lift solar panels onto your roof, you can use a ladder railing system, a pulley system, a lifting bag, or even DIY lifting systems using a pulley. Carrying them up the ladder can also be done with products like the solar panel caddy, and all of these ideas will make this task that much easier. RGC's new Platform Hoists are engineered for heavy-duty lifting, offering increased capacity and stability for solar installation teams. One of the flagship products that we have created is the Solar Panel Caddy. This tool has taken the solar industry by storm and companies.
