

# Hungarian government procurement of wind-resistant photovoltaic cabinets

## Overview

---

A call for applications encourages domestic companies to set up and operate energy storage facilities for at least ten years. The new regulation adopted as of 1 January 2024, has brought a general turnaround regarding the wind sector. Restrictions were reduced significantly, and the detailed technical limitations were replaced by basic general rules. Renewables Share (Recent Trend) Renewables in gross final energy. We reported in January that, after a decade-long wait, regulatory barriers to the establishment and expansion of wind farms in Hungary were lifted thanks to a package of legislation that entered into force on 1 January 2024. The government is supporting the sector through various procurement measures, including: What Renewable Energy does. r has developed recent-ly, mainly focusing on photovoltaic power plants. There are future projects which have already. This country-specific Q&A provides an overview of renewable energy laws and regulations applicable in Hungary.
