

Integrated self-generating solar light

Overview

These street lights integrate solar panels, LED light sources, lithium batteries and controllers into a single unit, which can realize autonomous power supply without grid access. SELS Solar offers integrated lighting systems that match the requirements of your unique lighting projects. With a focus on durability, reliability and longevity, our integrated solar led street lights provide motion activation that is ideal for parking lot, street lights, pedestrian and cyclists. For a true green solution to brighten up outdoor areas, turn to ILF! Our all-in-one solar street lights feature integrated solar light panels that soak up sunshine and convert it into usable energy. Solar luminaires that generate energy themselves in an environmentally friendly manner and provide light independent of the availability of electricity networks allow. All in one solar street lights integrate a monocrystalline solar panel, Phillips 5050 LED chips, and a long life LiFePo4 battery into a compact, reliable, and extremely bright package.
