

# Ireland energy storage for grid stability

## Overview

---

The Electricity Storage Policy Framework 2024, published in July 2024, aims to harness the full potential of the role storage plays in supporting grid stability, boosting renewable energy usage, and providing economic opportunities. Responding to the recent consultation on the long-duration energy storage procurement. Electricity storage, which entails capturing electricity produced at one time for future use, will be a key element in the successful operation of our electricity network and will accelerate our use of renewable electricity, providing cheaper, greener electricity to the consumer. Grid scale. Irish grid operator EirGrid set the proposed minimum procurement for long duration energy storage procurement at 201 MW, well below its initial 2030 goal of 500 MW of storage capacity. Energy Storage Ireland called for more ambition and a longer contract length to reflect international standards. In addition to enabling renewable penetration and reducing the need for fossil fuel powered backup generation, LDES will also improve the performance and cost-efficiency of the grid, which is a main concern in any energy transition. LDES is on the rise, and recent years have seen it receive. At Energy Storage Ireland 2025, the message was clear: energy storage is central to a stable, low-carbon grid, and while short-duration battery systems (BESS) are available, long-duration storage (LDES) supply is in its infancy, however ESBN has a structure to enable LDES rollout in Ireland.

## Ireland energy storage for grid stability

### [Powering Ireland's Future: The Energy Storage Revolution](#)

"Energy storage really is the key piece of the puzzle when it comes to the energy transition," Bobby explains. With increasing volumes of wind and solar on the grid, storing renewable

### Electricity Storage Policy Framework

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key stakeholders and ...

### [EirGrid Consults On Scheme To Facilitate 500MW Of Long](#)

The consultation stems from the Government's Electricity Storage Policy Framework of 2024 which, following a Call for Evidence on long duration electricity storage (LDES) by EirGrid in ...

### [Longer-duration and wind co-location at Ireland's first 4-hour BESS](#)

Construction is underway by Statkraft at Ireland's first 4-hour grid-scale battery energy storage system (BESS) in County Offaly, in Ireland's midlands. The 20MW, 4-hour BESS solution is ...

## [Government outlines electricity storage future - Energy Ireland](#)

The Electricity Storage Policy Framework 2024, published in July 2024, aims to harness the full potential of the role storage plays in supporting grid stability, boosting renewable energy ...

## [Irish energy industry calls for 500 MW of storage capacity by 2030](#)

On LDES, Lambert said: "Long-duration storage is essential for reducing renewable curtailment and maintaining system stability. It's also key to delivering energy security and ...

## **Long Duration Energy Storage**

With a target of 80% renewable electricity from intermittent sources on our grid by 2030, Ireland will require a significant amount of energy storage in the years to come.

## [Critical role of battery storage in Ireland's](#)

## [energy plans](#)

Experts across the sector agreed that energy storage will be crucial for balancing the increasing share of renewable energy on the grid while maintaining the security of supply, in addition

## **Energy Storage Practice in Ireland , EnergyPro**

At Energy Storage Ireland 2025, the message was clear: energy storage is central to a stable, low-carbon grid, and while short-duration battery systems (BESS) are available, long-duration ...

## [Energy Storage Ireland calls for 500 Megawatts of energy storage by](#)

Energy Storage Ireland urges EirGrid to deliver Ireland's 500 MW storage target by 2030, boosting renewable energy, lowering electricity costs, and improving energy security.
