

# Is it okay to use photovoltaic panels on the walls of the factory

## Overview

---

Mounting panels on walls is not optimal for year-round production. The 80°-90° angle disadvantages them during significant parts of the year, especially in the summer, when we have the best potential for harvesting solar energy in the northern hemisphere. Traditionally, solar panels are mounted on roofs to capture direct sunlight throughout the day. But is it effective?

### Why Consider Wall Mounted Solar Panels?

Limited Roof Space: Not every property has an expansive roof suitable for solar panels. Solstex solar panels on the facade. Solar panels can be effectively utilized as walls, providing both energy generation and structural benefits. They serve as a dual-function element, 3. In this case, this did not work well.
