

# Is there a direction for installing photovoltaic panels

## Overview

---

The direction of the solar panel should be facing the equator (due south in the Northern Hemisphere and due north in the Southern Hemisphere). As for the angle, you'll want to make sure that the panels are tilted at an angle that's appropriate for your latitude. Before we get into the nitty-gritty of how to install solar panels on your rooftop, balcony, or grounds of your property, it's crucial to understand that photovoltaic modules (PV) — like solar panels and shingles — require additional components to operate. Professional installers refer to essential. This comprehensive guide walks you through every step of your solar project, from initial assessment to system commissioning. Ideally, they should be installed in a.
