

# Islamabad solar energy for the environment

## Overview

---

In 2025, the solar boom Pakistan 2025 is reshaping Islamabad. Affordable rooftop solar panels are spreading rapidly across homes, offices, and schools, turning the capital into a hub of green energy adoption and energy independence. This solar transition is driven by demand from frustrated Pakistani citizens who have.

ISLAMABAD - Solar power generation in Islamabad has crossed a major milestone, with residents now generating over 100 megawatts (MW) of electricity through rooftop solar systems under the net metering initiative. Since the launch of the net metering project in 2016. As Pakistan's capital city, Islamabad has embarked on an ambitious solar energy expansion that positions it to lead the country in clean power adoption. 5-5 year payback periods and decades of free electricity afterward.
