

Kyiv is building a wind power generation system

Overview

Ukraine is currently constructing over 700 MW of new wind power capacity, along with more than 200 MW of battery energy storage systems (BESS), according to Andriy Konechenkov, Chairman of the Board of the Ukrainian Wind Energy Association (UWEA). "Even more importantly, we have projects already. An international finance package will bring €157 million of project finance debt to a private wind power project that aims to boost Ukraine's energy security. The deal, announced today in Kyiv, is co-financed by the European Bank for Reconstruction and Development (EBRD), International Finance. What Ukraine needs and can afford during wartime, they argue, is a large number of smaller power plants—generators that are relatively cheap, quick to build, less reliant on the national transmission grid, and harder for Russian missiles and drones to destroy. The war against Ukraine has led to massive destruction of the energy infrastructure. One consequence of this is blackouts in cities. [1][2] At the end of 2021 there was 1. [4] By the end of 2017, 505 MW of wind power plants. Ukrainian wind power is growing fast, despite major setbacks caused by the war. At the Ukrainian Wind Energy Forum-2025, Yuriy Shafarenko, a representative from the Office of the President, reported that 1,300 MW of Ukraine's 1,947 MW of wind-powered electricity generating capacity is in areas.

Kyiv is building a wind power generation system

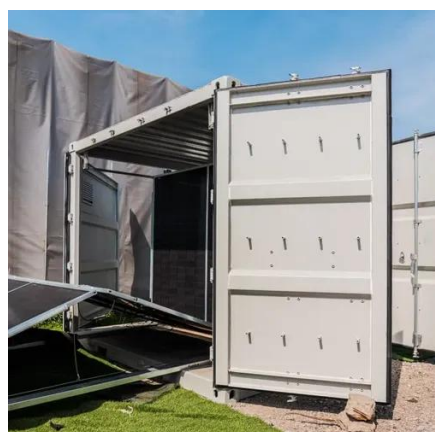

Wind power in Ukraine

By the end of 2017, 505 MW of wind power plants had been launched in Ukraine, with 138 MW remaining in the occupied territory of Donetsk and Luhansk regions, and another 87.8 MW left in occupied Crimea. As of March 2019, 8 wind farms were being built in Ukraine with a total capacity of almost 1 GW. This is Ovid Wind (Odesa Oblast) - 87 MW; Black Sea WPP (Mykolaiv Oblast) - 70 MW; Prymorska WPP (Za...
