

Liberia microgrid operation

Overview

The first newly constructed mini-grids co-funded by the Beyond the Grid Fund for Africa (BGFA) are delivering electricity in northern rural Liberia. This week marked. Hundreds of homes as well as clinics and schools in northern rural Liberia are set to be powered by solar mini-grids – part of a wider electrification drive aimed at bringing a stable electricity supply to thousands more. For much of the world, access to affordable and dependable electricity underpins healthcare. MONROVIA – Liberia has overhauled its mini-grid and micro-utility regulations in a bid to accelerate rural electrification, with energy sector stakeholders endorsing reforms they say will cut red tape, protect investors and unlock private capital for off-grid power projects. Questions?
