

Lithium titanate battery 10A cylindrical

Overview

4V 10Ah lithium titanate cylindrical LTO battery cell with 20C discharge rate and more than 20000times cyclelife. Individual pricing for large scale projects and wholesale demands is available. For easy assemble, we will weld M4 studs on the cell. Engineered for extreme durability, LTO chemistry offers an unparalleled cycle life (25,000+ cycles), ultra-fast charging, and outstanding performance in low temperatures, making it ideal for the most demanding applications. 5 billion annually, with projections indicating a 15% CAGR through 2030. This growth stems primarily. Nichicon manufactures cylindrical type, board-mount rechargeable LTO batteries for a range of applications including automotive, consumer electronics, internet of things, and other space-constrained applications. It will not catch fire or explosion under collision, over the charged or short circuit; The 2.

Cylindrical LTO Battery Cell -

Lithium titanate is a relatively new class of lithium ion. It is characterized by very long cycle life measured in thousands of cycles along with very high discharge and charge rate capability.
