

# Lithuania electricity regulations

## Overview

---

Energy Law of the Republic of Lithuania: The core legislation regulating energy generation, transmission, distribution, supply, and consumption. Embassies worldwide by Commerce Department, State Department and other U. agencies' professionals Until a few years ago, Lithuania had no alternative gas supply or electricity. The IEA examines the full spectrum of energy issues including oil, gas and coal supply and demand, renewable energy technologies, electricity markets, energy efficiency, access to energy, demand side management and much more. Through its work, the IEA advocates policies that will enhance the. GENERAL PR

nex to th ity Trading Rules. Market participants shall mean a transmission system operator, distribution grids' operators, electricity generators, suppliers, who according to legal acts have entered into balancing electricity sales contracts with balancing energy suppliers, also. National Energy Regulatory Council (hereinafter referred to as the Council) shall be an independent state institution that regulates the activities of entities operating in the fields of energy, drinking water supply and waste water management services, waste management, alternative fuel transport. In 2025 electricity made up about 17% of final energy consumption. Only 1/4 of needed electricity was imported in 2025, and 3/4 were generated locally. Heat is primarily generated in CHP plants, mostly from biomass and waste – about 88% of energy used for heating in district heating networks.
