

# M-type photovoltaic waterproof bracket installation

## Overview

---

This guide correctly peels off all the complications and provides you a clear realistic step-by-step path whether you are installing it on a suburban roof or on a business site. Imagine your solar array as a tree. First, fix the M shape channels on the beam, then the aluminum fixing clamps are mounted on the M shape channel and attach to the bifacial modules with our bifacial clamps to fasten the solar panels. Introduction to the installation of waterproof trough photovoltaic bracket What is a photovoltaic mounting system?

Photovoltaic mounting systems (also called solar module racking) are used to fix solar panels on surfaces. SFS-BIPV-M is a waterproof bracket with a frame photovoltaic panel, which has good strength, beautiful appearance and easy installation. It has excellent waterproof performance and is welcomed by customers. Whether you're working on a tile roof, metal roof, or ground-mounted setup, proper bracket installation guarantees safety and optimal energy harvest.
